ERKADO

Every house is fitted with interior doors. This is why approaching doors only from the point of view of their functionality and practicality has long been insufficient. Underlining the best qualities in a perfectly furnished house, today they are an important component of interior design. For this reason, we create modern solutions, introduce attractive design and focus on the quality of workmanship to let you enjoy the choice of the Erkado doors.

We are committed to developing all business areas relevant for creating a product that meets your expectations. We achieve this goal by investing in technologically advanced production lines, staff training and systematic analysis of consumer needs. Our dynamic development would be impossible without the activity of the sales network participants.

Thank you for your inspiring suggestions and friendly feedback.

DECORATIVE PANELS

WALL-MOUNTED

Decorative panel: decorative strip OAK STC PL, adapter BLACK ST CPL, skirting board OAK ST CPL, door BALDUR 3 OAK ST CPL, black VSG glass

Decorative panels are mounted on the wall as a decorative element and at the same time improve the acoustics in the room.

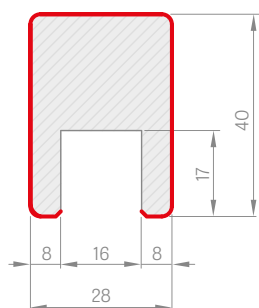

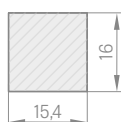

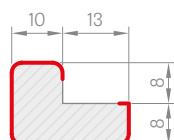

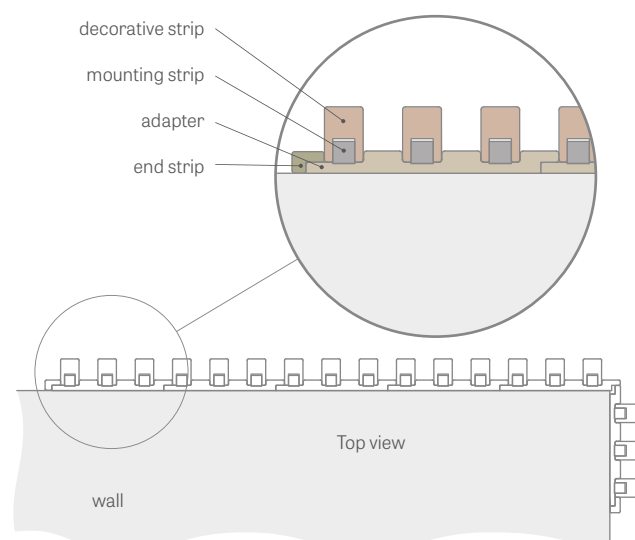

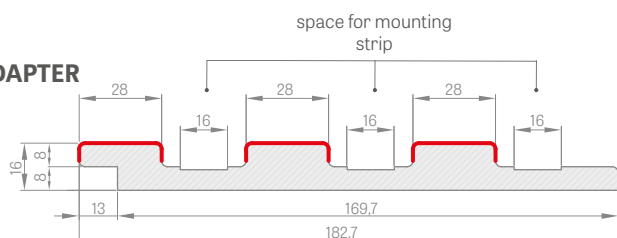

Mounting is possible in several ways - the decorative skirting board can be mounted to the wall by means of a mounting strip only or with the use of adapters which constitute a base for the panels.

Decorative panels are available in the PREMIUM and ST CPL laminates, which can be put together in combinations of your choice.

composition of decorative panels with the skirting board OAK ST CPL

components of the decorative panel

DECORATIVE STRIP**MOUNTING STRIP****END STRIP****DECORATIVE PANEL****ADAPTER**

— LAMINATE

adapter, length 2750 mm
decorative strip + mounting strip length 2750 mm
end strip, length 2750 mm

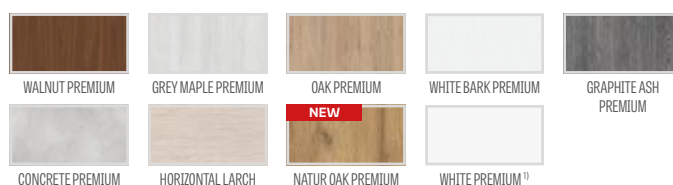

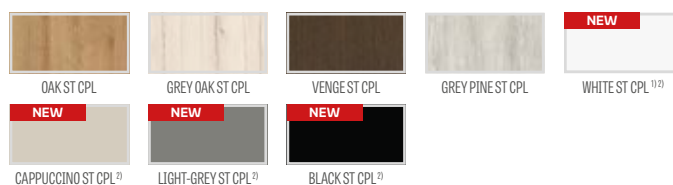

The individual elements of the decorative panel system are commercially available in a length of 2750 mm, however each product has a production length of 2800 mm and is delivered in this length, where 25 mm per side is a margin for free trimming before installation and also a reserve in case of transport damage.

The wall panels can also be mounted without an adapter directly to the wall using only a mounting strip on which we mount the decorative strip.

adapter - quantity in pack 1 piece

end strip - package quantity 1 piece

decorative strip + mounting strip - pack of 3 sets

CONSTRUCTION

- rebated, non-rebated or reverse door leaf
- MDF stiles and rails covered with two HDF boards in GREKO and FINISH laminates
- internal timber stile (sides and top, bottom -MDF) covered with two HDF boards in CPL and PREMIUM laminate
- honeycomb stabilising filling or solid core filling against an additional charge
- optionally, against an additional charge, upper panels extending the frame - page 134

NEW

FINISHING

- laminated HDF board
- door leaf edge made in the SOFT or STANDARD technology.
- reverse door leaf only in the STANDARD edge and in GREKO, PREMIUM and ST CPL decors
- edge (in STANDARD or non-rebated finish) laminated in edging in the same colour as the surface or, optionally, in plain black (black edging with transverse larch decor and a black edge with a transverse structure)

HARDWARE

- two pin mortise hinges or three hinges (GREKO & PREMIUM decors) in a rebated door leaf
- three concealed hinges in the non-adjacent leaf and two hinges in the reverse leaf in silver (black against an extra charge); hinges are supplied and priced with the door frame

NEW

- bolt lock in the rebated leaf and magnetic lock in the non-rebated leaf and reverse leaf: with a key, thumb turn, economy or with silver, with a blockade; optionally, against an extra charge, a black magnetic lock

NEW

GLAZING

- frosted decormat glass as standard**, transparent or, charged extra, frosted VSG 221 safety glass, plain on both sides
- possibility to change the glazing side to REVERSE (OBERSE - standard glazing)

ADDITIONAL CHARGES

reverse door leaf **NEW**

solid core filling (price includes a third hinge used in the rebated door leaf as standard)

door closer reinforcement

arm door closer (silver, black, white, brown)

additional bottom bar (can be cut by customer up to max 8 cm)

ventilation door cut or grille

plastic sleeves

metal round or square ventilation sleeves (4 pcs);
brushed nickel or patina finish in white or black

"100" rebated and non-rebated door leaf (price includes a third hinge used in the door leaf as standard)

frosted VSG 221 laminated glass, plain on both sides

additional hinge in the rebated door leaf and used always as per Czech standard (not applicable to solid core leaf, GREKO & PREMIUM decors and "100" leaf)

drop-down gasket ³⁾

metal hinge casings in the rebated door leaf (brushed nickel, patina, polished chrome, polished brass, white and black)

black door leaf edge finish **NEW**

can be replaced with a black magnetic lock for non-rebated and reverse leaves

OPENING INWARDS/OUTWARDS RC2 & RC3 BURGLARPROOF REBATED DOORS

Presented model: FORTECA RC2 & RC3 in OAK ST CPL laminate

FORTECA RC2, laminate NATUR OAK PREMIUM, handle black matt

FORTECA RC 2 NEW		
GOLD PACKAGE	SILVER PACKAGE	DOOR LEAF

RC2 – Important:

For compliance with RC2 burglary resistance class as per the PN-EN 1627:2012, the hardware should meet the following requirements:

- Min Class 2 as per PN-EN 1906:2012 – for handles and door face plates
- Min Class 4 and 1 as per PN-EN 1303:2015 – for lock cylinders

FORTECA RC 3 NEW		
GOLD PACKAGE	SILVER PACKAGE	DOOR LEAF

RC3 – Important:

For compliance with RC3 burglary resistance class as per PN-EN 1627:2012, the hardware should meet the following requirements:

- Min Class 3 as per PN-EN 1906:2012 – for handles and door face plates
- Min Class 4 and 1 as per PN-EN 1303:2015 – for lock cylinders

GENERAL INFORMATION

- the FORTECA inwards/outwards opening burglar-proof doors are rated for sound insulation at $R_w=38$ Db, have a burglary resistance class of RC2 OR RC3 as per PN EN 1627:2012 and class 5 for mechanical durability.
- available in the GOLD and SILVER packages with optional installation kit and steel door frame.
- designed to be used as an internal front door.

CONSTRUCTION

- timber stile covered with glulam HDF boards
- specially designed solid core filling
- whole door leaf reinforced with a steel panel
- door leaf thickness of 46 mm

FINISHING

- leaf edge made in the STANDARD technology (with CPL 0.2 & 0.7 laminates, with the ABS edging in the same colour as the leaf only or with a standard black edge against an additional charge)
- 8 mm or 220 mm wide black brushed steel or OAK CPL inserts (inlays) flush with the door leaf, on both sides of the leaf **NEW**
- the edge laminated in the same colour as the door leaf or, optionally plain black (transverse larch, black edge with a transverse structure) **NEW**
- HDF board covered with the FINISH, GREKO or PREMIUM laminate
- side and top panels glued to the wall (only with a masonry wall installed door frame and an 8 cm clip-on square) made to order for additional charge - page 134 **NEW**

HARDWARE

- four silver 2-pin hinges; $\varnothing 16$; 3D adjustable (2D with steel frame)
- four-point security hook bolt lock as standard for two lock cores
- four-hinge bolts on the hinge side
- possibility to apply an arm door closer
- lower lock PZ centre is 92 mm

FIXED REBATED DOOR FRAME

- fixed timber door frame covered with MDF boards; Internally reinforced with a steel square on the door striker plates side for FORTECA RC3
- installation in the range of 90-450 mm every 40 mm
- adjustable main grip in the door frame and two adjustable grips for the bolt hook and additional lock

GOLD PACKAGE

- the GOLD PACKAGE FORTECA doors are complete with a steel or timber threshold, with a multipoint lock, and pre-drilled holes for a security handle and upper face plate. They come with a door viewer (hole to be drilled by the customer) and certified security handles and lock cores.

SILVER PACKAGE **NEW**

- the SILVER PACKAGE FORTECA doors are complete with a steel or timber threshold, and a multipoint lock. We recommend ordering a door viewer and certified hardware from the ERKADO range or ordering the same from an external supplier keeping in mind the important note on compliance with the anti-burglary requirements (p. 100).

ADDITIONAL CHARGES

"100" door

black door leaf edge finish

handle PZ centre of 92 mm with the top face plate for RC 2 doors, silver F9 or black (Class 2 as per the PN-EN 1906:2012 standard)

handle with lock core protection and the rosette plate for the RC3 door; F9 silver (Class 3 as per PN-EN 1906:2012)

two silver lock cores set (one with a thumbturn) in a master key system for RC2 and RC3 doors (Class 4 & 1 as per PN-EN 1303:2015)

door viewer (nickel or black)

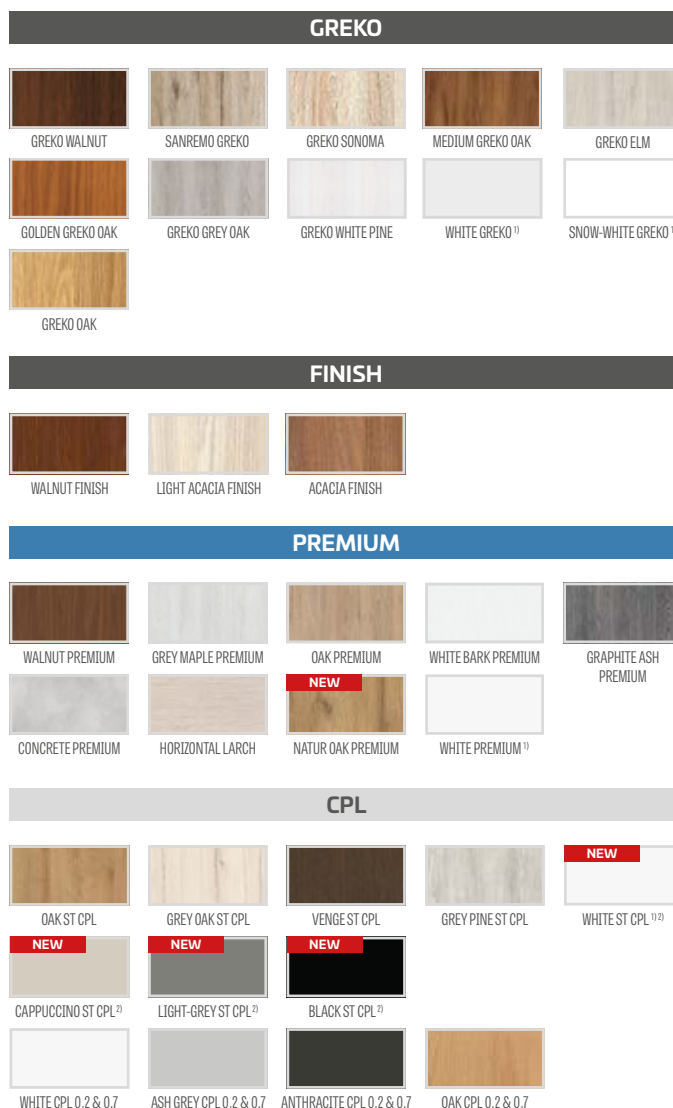

metal hinge covers (satin nickel, patina)

cutting the door with the wooden frame to 8 cm and with steel frame to 1 cm

FRONT DOORS WITH BURGLAR-PROOF LOCKS OR STRIP LOCKS

Presented model: HERSE SET in GREKO WALNUT finish with ESSEN handle

GENERAL INFORMATION

- HERSE SET Doors are designed for housing and public utility building as an entrance internal door (excluding the "80N" width).
- the HERSE SET leaf with fixed and adjustable door frame with each of threshold available is rated for sound insulation at $R_w = 32\text{dB}$
- HERSE SET Doors in GOLD and SILVER Packages are fully preassembled with a threshold fitted, and pre-drilled holes for handle and face plate installation for the GOLD version.

CONSTRUCTION

- timber and MDF stile covered with two HDF boards
- specially designed solid core filling
- robust steel channel section reinforced
- door leaf thickness of 46 mm
- additional gasket in the door leaf

FINISHING

- door leaf edge made in the SOFT or STANDARD technology
- CPL 0.2 & 0.7 laminates available only with the STANDARD edge with the ABS edging in the same colour as the door leaf only or, against an additional charge, with a standard black edge
- 8 mm or 200 mm wide brushed steel, black or OAK CPL inlays flush with the door leaf, on both leaf sides
- the STANDARD edge laminated in the same colour as the door leaf or, optionally, plain black edging (transverse larch, black edge with a transverse structure) **NEW**
- pre-cut up to 8 cm as an option
- custom order with the lower lock only as an option
- side and top panels glued to the wall (only with the adjustable door frame and an 8 cm square) - page 134 **NEW**

HARDWARE

- three silver 2-pin hinges; $\varnothing 16$; 3D adjustable (2D with a steel frame)
- two 3-pin Class 2 rated security locks with a thumb turn (optionally only lower)
- three hinge bolts on the hinge side
- possibility to apply an arm door closer
- lower lock PZ centre is 72 mm
- optionally, a bolt strip lock with two cores, against an extra charge

REBATED FIXED AND ADJUSTABLE DOOR FRAMES

- optionally, an electric door strike can be used in the door frame for the lower lock with no upper lock in the door leaf.
- adjustable main keeper in frames
- the 80N **NEW** width is available on the fixed door frame only

FINISH

CPL

PREMIUM

¹⁾ plain white laminate imitating a painted surface

²⁾ special AntiFinger coating to reduce dirt and fingerprints

GENERAL INFORMATION

Fire protection, smoke control and sound insulation are ensured only when a complete doorset is installed, including a fire door leaf (with gaskets, lock, hinges and drop-down gasket pre-assembled), door frame, door closer, as well as a lock core and handle in compliance with the Polish Standard.

The sound insulation of the HALSPAN door system supplied with a drop-down gasket as per PN-B-02151-03:1999 is rated at $R_w=32$ dB

The door leaves are marketed complete with a timber or steel door frame only.

CONSTRUCTION

- filled with a special HALSPAN board with a thickness of 44 mm for Type EI30 and 54 mm for EI60
- overall door leaf thickness 50 mm in EI30 and 60 mm in EI60
- softwood door frame
- fire rated and smoke intumescent door gasket
- drop-down gasket
- transparent fire-resistant glass; the glass width is fixed (not dependent on) the door leaf width

FINISHING

- leaf edge made in the STANDARD technology (with CPL 0.2 & 0.7 laminates, laminated with the ABS edging in the same colour as the leaf only) or with a standard black edge against an additional charge
- 8 mm or 200 mm wide brushed steel, black or OAK CPL inlays flush with the door leaf, on both leaf sides Applies to LEDA full only. **NEW**
Inlay types shown on pages 80-81
- two-sided inlays only in full leaf and on only on the active leaf in double-leaf doors
- the edge laminated in the same colour as the door leaf or, optionally plain black (transverse larch, black edge with a transverse structure) **NEW**
- side and top panels glued to the wall (only when fitted with an 8 cm square) - page 134 **NEW**

HARDWARE

- four hinges; Ø16; 3D adjustable (2D for the steel frame)
- thumb turn cylinder lock
- door closer against an additional charge

DOOR FRAMES

- fire rated fixed door frame
- fire rated gasket
- adjustable door striker plate
- adjustable steel, square large or welded frames in RAL 9010, 8003, 8017, 7035, 7016, 1005
- fixed frame made of black sheet metal, thickness 1.5 mm, RAL powder painted, welded in the corners, fitted with a fire rated gasket and door closer reinforcement as standard.

ADDITIONAL CHARGES

fire rated door closer with scissor arm
colours: silver, black, white, brown

fire rated cam-action door closer
(For frames with or without housing with a clip-on square)
colours: silver, black, white, brown

fire rated ventilation grille

JOVE INOX handle, long face plate, lock core, see p. 127

30/40 lock core (EI30) or 30/50 (EI60)

fire-proof door viewer, satin, chrome

fire rated upper deadbolt lock

black door leaf edge finish

housing for EI30 from 100 to 460 and
housing for EI60 from 120 to 480 every 40 mm
double door housing

fire rated electric door strike
(standard) 12/24V (not for the steel door frame)

steel door frame in RAL not in the range (intensive, pearl and metallic colours not included)

steel door frame made of galvanised sheet steel

EI30
Extra charge for Type 3, 4, 5, 6, 8 glazing

EI60

GENERAL INFORMATION

Fire protection, smoke control and sound insulation are ensured only when a complete doorset is installed, including a fire door leaf (with gaskets, lock, hinges and drop-down gasket pre-assembled), door frame, door closer, as well as a lock core and handle in compliance with the Polish Standard.

The sound insulation of the door with a drop-down gasket as per PN-B-02151-03:1999 is rated at $R_w=39$ dB

The door leaves are sold complete with a wooden door frame only.

The doors have an anti-burglary RC2 certificate for inward opening doors.

CONSTRUCTION

- special 44 mm thick filling
- total door leaf thickness of 50 mm
- softwood door frame
- fire rated and smoke intumescent door gasket
- drop-down gasket

FINISHING

- leaf edge made in the STANDARD technology (with CPL 0.2 & 0.7 laminates, laminated with the ABS edging in the same colour as the leaf only) or with a standard black edge against an additional charge
- 8 mm or 200 mm wide brushed steel, black or OAK CPL inlays flush with the door leaf, on both leaf sides **NEW**
- the edge laminated in the same colour as the door leaf or, optionally plain black (transverse larch, black edge with a transverse structure) **NEW**
- side and top panels glued to the wall (only when fitted with an 8 cm square) - page 134 **NEW**

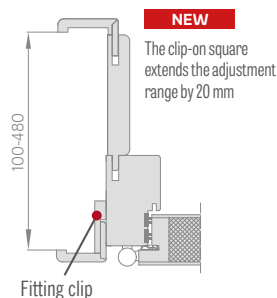

HARDWARE

- four hinges; $\varnothing 16$; 3D adjustable
- multi-point bolt strip lock with two locks
- door closer against an additional charge

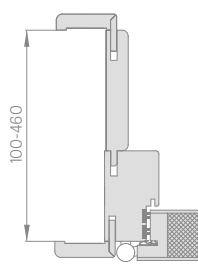

DOOR FRAMES

- fixed wooden fire protection door frame optionally with cladding
- fire rated gasket
- adjustable door striker plate

TECHNICAL INFORMATION

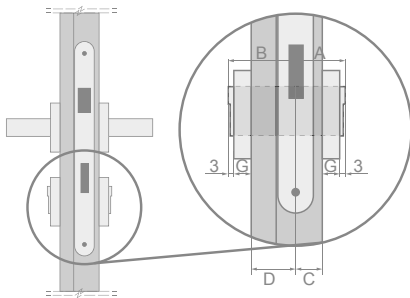

DOOR OPENING DIRECTIONS

DOUBLE DOORS

HOW TO SELECT A LOCK CORE

Example of calculating the lock core size for the flush and stile doors (40mm) with the face plate thickness of $G = 7$ mm

$$A/B = (C+G+3) / (D+G+3)$$

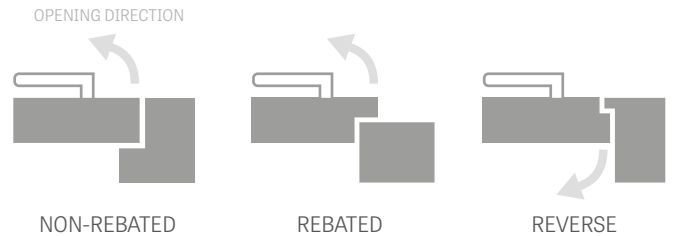

$$A/B = (15+7+3) / (25+7+3)$$

$$A/B = 25/35$$

Door type	Door leaf thickness	Proportion of lock setting in door (C/D)	Recommended lock core size (A/B)*
Flush, stile (rebated)	40 mm	15/25	26/36
Flush, stile (non-rebated)	40 mm	20/20	30/30
HERSE	46 mm	15/31	30/45
LEDA EI 30	50 mm	19/31	30/40
LEDA EI 60	60 mm	19/41	30/50
FORTECA RC2 & RC3	46 mm	20/26	30/40
HYPERION EI30 RC2	50 mm	19/31	30/40

* Recommended lock core size for the escutcheon thickness of 7 mm and play of 2 mm to 4 mm

FINISH

The Finish laminate is pre-impregnated, which means printing and then coating with paint with required properties. Using the performance finishing coats adds to the surface's basic resistance.

GREKO

The Greko laminate is also pre-impregnated, which means printing and then coating with paint with required properties. Using the performance finishing coats adds to the surface's resistance and flexibility of the product. The paint's silicon content ensures the film resistance is enhanced.

The Greko laminate is manufactured on a high density Japanese base layer which is not resin coated. This makes the film ecological, healthy and safe for people and environment both in the production process and during use, as well as for disposal. No formaldehyde or other harmful ingredients is used.

Its distinctive patterns are what distinguishes the Greko film. The laminates bear striking resemblance to wood, as the high quality surface comes with a 3D natural wood effect. Woodgrain decors look just like wood

PREMIUM

The Premium laminate is a product based on Polypropylene (PP), a material of very high resistance to abrasion and scratching, plus top quality appearance. It adds a refined looks and individual character to the doors, as it imitates natural wood perfectly.

Not only does the Premium laminate attracts with its appearance but with its functionality, as it resists scratching better than average products and is fire-retardant and abrasion resistant.

These properties ensure the extended longevity and maintenance-free use of the PREMIUM range products even in most adverse conditions.

ST CPL, CPL 0,2 and CPL 0,7

The CPL laminate is composed of a decorative layer impregnated in resins, and a base layer ensuring flexibility. Following the lamination process, the top resin layer is hardened for high resistance to scratching and abrasion. It is characterised by high resistance to impact, abrasion, scratching, heat and UV radiation

Thanks to using this type of material, the door can be installed in so-called "difficult" interiors [exposed to heat, moisture or extraordinary use]. Approx. laminate thickness: ST CPL - 0,15 mm, CPL 0,2 - 0,2 mm and CPL 0,7 - 0,7 mm. The CPL 0,7 laminate is used to cover only one leaf plane thanks to its unique hardness. The CPL 0,2 and CPL 0,7 laminated door leaves come with the leaf edge made of the so-called ABS, a highly durable PVC.

ST CPL laminate in decors white, light grey, cappuccino, black has been refined in the AntiFinger coating limiting dirt and fingerprints. **NEW**

UV VARNISH

The door surface has several coats of the WHITE TITANIUM UV modern UV hardened varnish.

The flat surfaces are covered with a specialist base membrane in the first phase, and then coated twice with a top quality paint and hardened with UV.

The moulded surfaces cannot be covered with the membrane for technological reasons, so they are coated with three paint layers and hardened with UV.

The fully automatic coating process follows scanning to ensure ideal quality of the surface. Hardening the paint with the cutting-edge method involving UV light source ensures very high mechanical resistance.

EDGE FINISH TYPES

EDGE SOFT

The SOFT door leaf comes with a chamfered edges, which lends an aesthetic and modern look to it. The leaf is finished with a laminate of an improved resistance to scratching, which dramatically enhances its resistance during use.

STANDARD EDGE

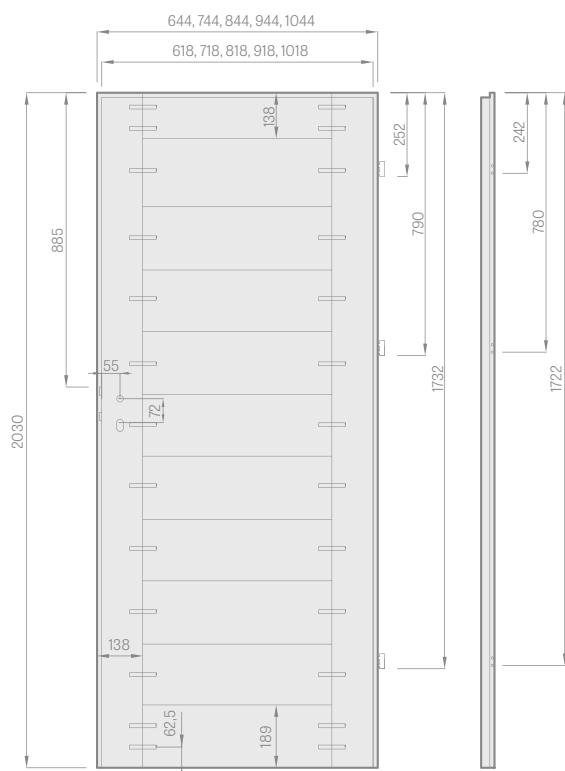

It involves covering the flat plane with the 0.15 mm ST CPL laminate, CPL 0.2, CPL 0.7 laminates, polypropylene PREMIUM laminate, GREKO laminate or FINISH film.

The door leaf made in STANDARD technology has unchamfered edges, which is where the face panel is joined with edging laminate, as shown in the diagram. The laminate in the CPL 0.2 and CPL 0.7 laminates is made of very durable PVC, the so-called ABS. The joining method of the laminate is also identical for the non-rebated doors and non-rebated sliding systems.

¹⁾ applies only to BALDUR 1 in WHITE ST CPL laminate

STILE DOOR LEAF

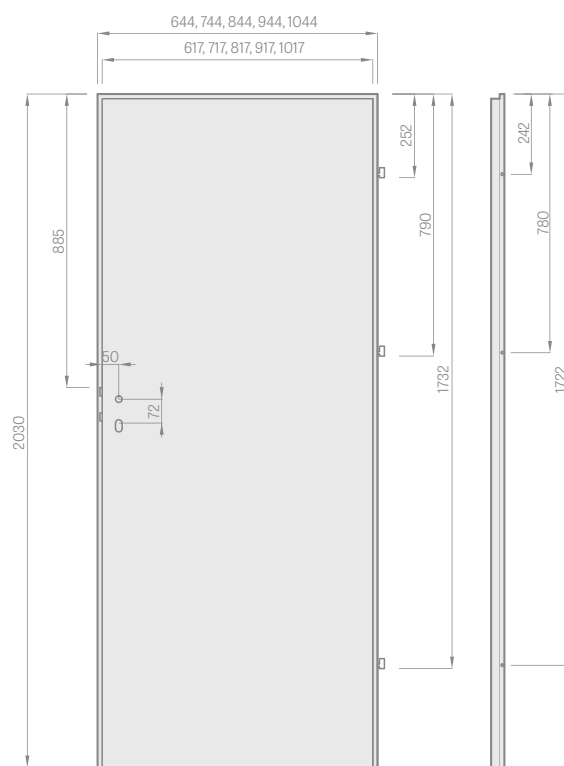

Rebated door leaf

- A** MDF or timber stiles in PREMIUM laminate
- B** MDF rails

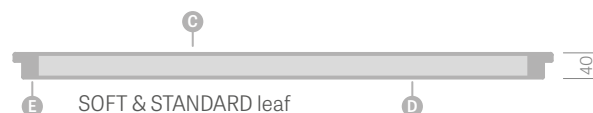

PANEL DOOR LEAF

Rebated door leaf

HERSE SET leaf

SOFT & STANDARD leaf

NON-REBATED door leaf

- A** MDF board; **B** gasket; **C** HDF board; **D** filling;
- E** MDF or timber stiles in Herse SET and UNO PREMIUM

Solid 35 mm or 22 mm thick rail

We assemble the magnetic door stop in a special place milled for this purpose on our own.

Product delivered as a separate assortment.

Caution (important information in case of underfloor heating): the floor element should be placed in the Ø14mm hole, 45 mm deep.

METAL CAPS FOR HINGES

Brushed nickel, patina, glossy chrome, glossy brass, white matt and black matt

Cap sizes:

- ID 16 mm for HERSE SET and FORTECA door types and fire-rated LEDA AND HYPERION
- ID 15 mm for panel and stile doors
- length 47 mm

VENTILATION

Plastic sleeves for FINISH colour group

Plastic woodgrain sleeves for STILE doors with GREKO, PREMIUM and CPL decors

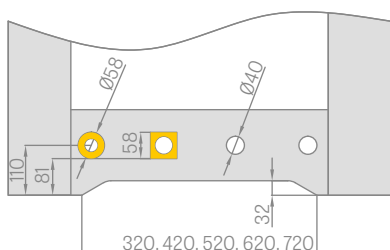

Square and round metal sleeves

Grilles

VENTILATION

Ventilation door cut not available in non-rebated door leaves for wall-mounted and pocket sliding doors.

ELECTRIC DOOR STRIKE

(Available for fixed and adjustable door frames for rebated doors, see p. 161-163, but unavailable for the door frames used with the GRAF glass panes and double-leaf doors)

Types of electric door strikes:

- basic 12 V
- basic 24 V
- switch operated 12 V
- switch operated 24 V
- reverse 12 V
- reverse 24 V

BASIC

SWITCH OPERATED

REVERSE

- normally closed, and opened when voltage is fed
- same operation as in the basic strike, but with an option to be switched off by moving the springbolt
- closed when voltage is fed, opened when not

The reverse and switch operated electric door strikes unavailable for the fire doors

CUTTING THE DOOR LEAVES

Cutting the door leaves to size by customer acc. to Polish standard, up to 50 mm, or up to 80 mm for the HERSE SET door leaves (unless pre-cut), as well as in the panel door leaves, is possible if an additional lower strip has been fitted by the manufacturer.

(NOTE: cutting the door leaves to size by customer is not allowed for the FRAGI doors, double-leaf and fire doors, non-rebated leaves for sliding systems, glass GRAF doors, FORTECA RC2 and FORTECA RC3 burglar-proof doors, and stile doors acc. to the CZ standard).

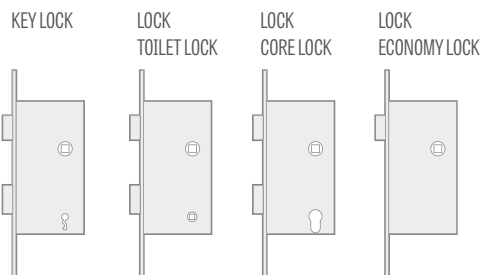

The door leaf height made acc. to the so-called CZ standard is lower than the PL standard by 47 mm.

CLEANING, REVITALISATION & REGENERATION KIT FOR OTTIMO DOORS

HARDWARE

DEADBOLT LOCKS

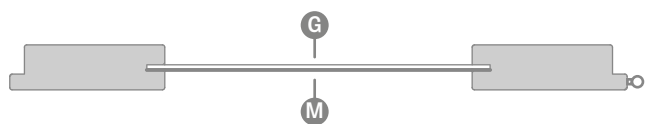

LOCK PZ CENTRES:

1. For rebated door leaves, the PZ centre of the key operated deadbolt lock, toilet lock and core lock is 72 mm.
2. For non-rebated and reverse door leaves, the PZ centre of the magnetic lock is:
 - 90 mm (key operated and toilet locks)
 - 85 mm (core locks)

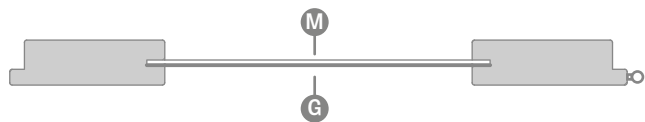

The toilet locks have a square-shaped bolt hole:

- acc. to PL standard: 4 mm
- acc. to CZ standard: 6 mm

SLIDING SYSTEMS

WALL-MOUNTED

WALL-MOUNTED SLIDING DOOR SYSTEM:

SINGLE SP1Nz (with bolt keeper)	
SINGLE SP1Nb (w/o bolt keeper)	
DOUBLE SP2N	

Price includes:

Aluminium track with a cover profile and door stop in the colour of the door leaf and length:

- 210 cm for "100" leaves
- 200 cm for "90" leaves
- 180 cm for "80" leaves
- 150 cm for "70" "60" leaves

Available wall-mounted sliding system sets

- track with a cover profile and door stop with gasket (only SP1Nz & SP1Nb)
- track with a cover profile and tunnel door frame (only for SP2N)
- track with a cover profile and door stop + tunnel door frame (only SP1Nz & SP1Nb)
- track with a cover profile and door stop with gasket + tunnel door frame (only SP1Nz & SP1Nb)

The non-rebated door leaf for wall-mounted sliding system cannot be cut to size.

The cover profile is neither laminated nor paint coated on the inside.

ADDITIONAL CHARGES

tunnel type adjustable door frame for the price of the adjustable door frame

hook bolt lock with hardware
only for the single system

oval, rectangular or round pull handle; glossy chrome, brushed chrome, glossy brass, black matt; two pcs. of pull handles per set

WALL-MOUNTED SLIDING DOOR SYSTEM

LOFT Type

LOFT TILES, laminate OAK ST CPL, round handles, RETRO handles

LOFT Type wall-mounted sliding door system is available in black and comes complete with the LOFT Type plain door leaf. The LOFT door leaf comes with the stabilising "honeycomb" filling as standard or solid core for extra charge. The door leaf features a non-rebated edge. The system is designed for clear finished opening, without a tunnel.

The complete system includes the sliding LOFT system + LOFT door leaf + pull handle + door closer on one or both side(s).

The double LOFT system is counted as 2 x single system + connecting rail element.

Choice of two handles holding the leaf: INDUSTRIAL and RETRO.

LOFT sliding door system

oval, rectangular or round pull handle

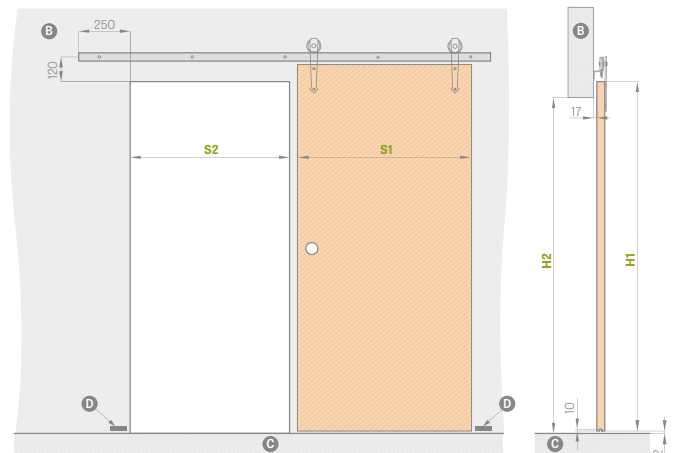

solid core filling

round and square metal ventilation sleeves (4 pieces); black matt

door closer on one side

connector for tracks (enables the use of the LOFT system in the double-leaf system)

DOOR FRAMES

- The adjustable and fixed rebated door frames can be used for all types of ERKADO internal doors made in both flush and STILE technologies.
- The adjustable non-rebated door frames can be used for internal doors made in both flush and STILE technologies. These door frames are supplied with three concealed hinges.
- The door frame is made with high quality MDF board and covered with durable wood grain film or coated with durable UV paint.
- Depending on the technology, the door frames are laminated with: FINISH, GREKO, CPL, PREMIUM and UV paint.
- The frames for STILE doors have a third hinge as standard.
- Each adjustable and fixed frame comes complete with disassembled frame components, hinges and screws. The components are supplied with pre-drilled holes for fixing.
- Each set is enclosed with assembly manual and warranty certificate.
- The fixed door frame for Herse collection is rectangular and its core is made of glulam timber.

TUNNEL TYPE ADJUSTABLE DOOR FRAME

REBATED / NON-REBATED

TUNNEL TYPE DOOR FRAMES

The tunnel type door frames are adjustable door frames without any hardware. They are made with a top strip and two vertical strips.

They can be used to finish door openings and safeguard wall corners, but mainly are fitted for interior decoration effects.

The tunnel type adjustable rebated door frames are also used in the ERKADO sliding systems.

The tunnel type adjustable non-rebated door frames are not used in the sliding systems.

Depending on the system, we use the following rebated tunnels:

TUNNEL FOR SP1N	Wall-mounted single sliding system
TUNNEL FOR SP2N	Wall-mounted double sliding system
TUNNEL FOR SP1C.100	Single "100" pocket sliding system
TUNNEL FOR SP2C.100	Double "100" pocket sliding system
TUNNEL FOR SP1C.125	Single "125" pocket sliding system
TUNNEL FOR SP2C.125	Double "125" pocket sliding system
Encasing ZN1	Wall encasing for one side of the single leaf systems SP1C.100 and SP1C.125
Encasing ZN2	Wall encasing for one side of the double-leaf systems SP2C.100 i SP2C.125

Edition I/2021/A applies as of 02/03/2021.

The door should be selected on the basis of a basic design of a facility, prepared considering all applicable standards and provisions of law, as well as frequency and conditions of use. ERKADO offers several variants, but leaves the final choice to the Buyer, because only the Buyer or their representatives knows the purpose and conditions of use for the product to be ordered.

Certificates can be downloaded from our website www.erkado.pl
