

Euroview Projection/Picture Windows

Our European style casements use projection friction stays and espagnolette locking instead of crank handles. The window's hinged sash swings in or out providing greater ventilation than typical hungs or sliders. These casements can provide emergency egress if needed. The awning and hopper window styles are often selected for use in small spaces because they open completely, allowing for positive ventilation. Awning windows are hinged at the top, opening out, and are designed to circulate air while protecting the interior from light rain. Hopper windows are hinged at the bottom, opening in, and are designed to offer ventilation and security. Awning windows are commonly used in combination with casement or fixed window units to add appeal aesthetics as well as ventilation, while hoppers are generally used in ground level rooms providing ventilation and security.

All VEKA projection windows come standard with high quality hardware. Smooth operating stays and espagnolettes, hinges that can be color matched to the vinyl or brushed nickel satin finish are available. The Picture windows are built with the Tilt/Turn frame and can be mullied with operable units or as ribbon windows used in commercial construction.

Euroview Projection/Picture Window

Euroview Performance Matrix

Product	Frame	Glazing	Performance		
Door Type	Frame Height	Sash Height	DP Rating	Unit Size	Size Limitations
Picture	67mm	N/A	DP-60	55.5" x 71.5"	64 sq ft
Picture	80mm	N/A	DP-70	60" x 97"	70 sq ft
Casement	67mm	80mm	DP-45	48" x 71"	48" x 72"
Awning	67mm	80mm	DP-50	60" x 40"	60" x 40"
